

MTI-1600

Municipal Telecommunications Interface

MTI-1600 Introduction

Public Sector Technologies' MTI-1600 is a state-of-the-art recording interface for use with Public Sector Technologies' recording administration system. Experience gained from manufacturing technology for the corrections industry since 1988 led Public Sector Technologies to develop recording and monitoring technology that meets and exceeds the expectations of small city jail administrators.

How do you provide an economical solution for recording communications within a police department/city jail application? The MTI-1600 interface combined with Public Sector Technologies' recording system provide this solution. Radio dispatch communications, PBX calls, non-contact visitation and inmate telephone conversations can all be recorded through a single, easy-to-use recording system.

Each MTI-1600 can provide an interface for up to 16 communication devices. Multiple interfaces can be used at a single location to meet the needs of the facility.

Features

- ▼ Interface For Recording Radio Dispatch and PBX Lines/Extensions
- ▼ Interfaces With Up To 16 Communication Devices
- ▼ Provides For A Complete Recording Solution For Police Departments/City Jails
- ▼ Simple Installation
- ▼ No Programming
- ▼ Standard Telephony Wiring (50-pin RJ-21X)
- ▼ Efficient Rack Mount Design

Specifications

Warranty: 18 months parts and labor

Dimensions: 17"W x 12.25"D x 4"H

Weight: 19 lbs.

Mounting: Brackets are provided for mounting on a wall or in a standard 19" relay rack.

Power Supply: 120 volts AC, 30 watts (standard wall socket)
